

Official Side Event of the Berlin Energy Transition Dialogue 2020

Guided tour: Renewable Urban Solutions

Friday, 27 March 2020 | language: English |

Forecasts show that two-thirds of the world's population will live in cities by the year 2050. As a result, demand for energy and private transportation is set to increase exponentially – and pollution will rise accordingly. Are real significant changes within cities foreseeable? What solutions can really make a change? Can sectors such as agriculture or energy crossover be integrated into modern and future living environments? To see both small and large-scale urban solutions that may have an immense impact on our future, join us on this tour!

Please note: Due to safety reasons, some sites can only be visited with flat and sturdy shoes. Changeable weather conditions require weatherproof clothing. Packed lunches will be provided. Filming and photography are not allowed unless otherwise indicated at the site.

Agenda - tbc	
9:30 am	Bus transfer
	<ul style="list-style-type: none">• Visit Mowea's modular wind energy system
	<ul style="list-style-type: none">• Visit a Sunfarming system at Estrel Berlin
