

Official Side Event of the Berlin Energy Transition Dialogue 2020
Guided tour: Decentralized Energy Systems

Monday, 23 March 2020 | language: English |

Pivotal to a successful energy transition is a switch from conventional and centralised energy generation to a decentralised system dominated by renewable energy generation and supporting technologies. But how does such a system work and what does it look like? To find out, join us on an excursion to one of the frontrunners in the renewable energy world.

Please note: Due to safety reasons, some sites can only be visited with flat and sturdy shoes. Changeable weather conditions require weatherproof clothing. Filming and photography are not allowed unless otherwise indicated at the site.

Agenda -tbc	
12:00 pm	<ul style="list-style-type: none"> • Bus Transfer
01:30 pm	<ul style="list-style-type: none"> • Guided tour through the village of Feldheim <p>The village of Feldheim is one of the most spectacular concepts for supplying enterprises, private households and local government with renewable energies on a decentralised, self-sufficient basis. This stop includes a presentation followed by a tour through the village – a visit of the nearby wind power plant, the associated biogas plant and finally the connecting battery storage facility.</p>
04:30 pm	<ul style="list-style-type: none"> • Bus Transfer
06.00 pm	<ul style="list-style-type: none"> • End Foreign Ministry

Agenda Guided Tour
Berlin Energy Transition Dialogue
24 – 25 March 2020 | Federal Foreign Office, Germany

**BERLIN
ENERGY
