

Official Side Event of the Berlin Energy Transition Dialogue 2020
Guided tour: Digital Energy Solutions

Monday, 23 March 2020 | language: English |

Virtual power plants, machine learning, artificial intelligence, blockchain technology... Every one of us has heard of, read about or even begun to discuss these buzzwords. But what are the drivers behind these technologies and concepts, and how are these innovations applied in the energy sector? To gain an understanding of the technology and potential applications, we will meet and speak with the visionaries at the crossroads of the digital and energy sectors.

Please note: Due to safety reasons, some sites can only be visited with flat and sturdy shoes. Changeable weather conditions require weatherproof clothing. Filming and photography are not allowed unless otherwise indicated at the site.

Agenda - tbc	
12:30 pm	<ul style="list-style-type: none"> • Bus Transfer
01:00 pm	<ul style="list-style-type: none"> • Lition Energy <p>Lition is a digital energy marketplace that connects consumers directly with producers of renewable energy. Without detours and unnecessary additional costs.</p> <p><i>Guide: Dr. Richard Lohwasser , CEO</i></p> <p><i>Stephan Vogel, Head of Business Development</i></p>
02:30 pm	<ul style="list-style-type: none"> • Bus Transfer
03:00 pm	<ul style="list-style-type: none"> • Adaptricity <p>Most distribution grids today are operated as a black box without much real-time insight into this crucial infrastructure. In order to ensure that distribution grids will not become the next bottleneck for the energy transition, grid operators need to take better advantage of today's digitization trends in distribution grids for achieving better grid transparency and thus higher RES shares at lower costs. Adaptricity will present some insights from its on-going projects with grid operators</p>
