

Official Side Event of the Berlin Energy Transition Dialogue 2020

Guided tour: Efficient Buildings

Thursday, 26 March 2020 | language: English |

The building sectors, including the construction and ongoing occupation of buildings, are responsible for over a third of global final energy consumption and nearly 40% of total direct and indirect CO₂ emissions. Despite such significant contributions, energy demand is continuing to rise, representing a lack of progress. Join us to gain first-hand knowledge of holistic housing solutions and innovative, sustainable construction technologies.

Please note: Due to safety reasons, some sites can only be visited with flat and sturdy shoes.

Changeable weather conditions require weatherproof clothing.

Filming and photography are not allowed unless otherwise indicated at the site.
